Art Unit: 3735

The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 2. Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 3. Regarding claim 1 the phrase "of the type" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "of the type"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).
- 4. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 3 recites the broad recitation mad of a poly-α-hydroxy acid, and the claim also recites preferably and

more particularly which is the narrower statement of the range/limitation. Similarly claim 2 recites the broad recitation of less than 2 years and the claim also recites preferably 16-24 months and claim 10 recites the broad recitation of at least in part and the claim also recites in particular and namely. In claim 4, pivot axes lacks positive antecedent basis. Claim 5, line 2 recites a positive connection to the body "coming into contact with the stomach", "adapted to" language should be used to avoid a positive connection to the body. In claim 12, line 2 the use of "possibly" renders the claim indefinite in that it is unclear whether the limitation is actually present or not. Claim 13 is indefinite in that it fails to further define limitations of the gastric ring to which it is dependent on. Further in claim 10 the proximal and distal links lack positive antecedent basis. In claim 12 the proximal link and said ancillary lack positive antecedent basis.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States
- 6. Claims 1 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Robinson (4,955,913).

Robinson discloses a device having an elongate element (11) that is deformable into a loop and a closure means (20) for securing the device in a loop and teaches that the device is made from an absorbable material (column 5, lines 1-14).

Application/Control Number: 10/516,350 Page 4

Art Unit: 3735

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 2-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Robinson in view of Vert et al (5,567,431).

Robinson discloses the claimed device except for the use of the specific absorbable polymer. Robinson also teaches (column 5, lines 47-54) that other variations may apply to the polymers which are readily apparent by those skilled in the art. Vert et al teaches that it is well known to use a polymer such as a poly(lactic acid) in the body and teaches that such a bioresorbable polymer is the most used (column 1, lines 5-23). Therefore a modification of Robinson such that the polymer used is any well known polymer used in the body and as taught by Vert et al, the most used, would have been obvious since this would have been the mere substitution of one well known absorbable polymer used in the body with another. With respect to claim 2, while the references do not specifically teach the time periods claimed, since the references teach the use of a lactic polyacid it is the examiner's position that the time period would inherently be within the claimed range since the references disclose the same material as claimed.

9. Claims 4-6, 8-12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

10. The information disclosure statement filed 11/30/04 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

- 11. Applicant is requested to provide a copy of the foreign documents and any translations and/or concise explanations of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language.
- 12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John P. Lacyk whose telephone number is 571-272
  4728. The examiner can normally be reached on Mon-Fri, 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chuck Marmor, II can be reached on 571-272-4730. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative of access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
